**Stuart Reid** Innovation is an inherently uncertain process and there is great potential in taking an emergent approach to the exploration of possibilities. The approach of this company is an example of disruptive thinking. Of course, the degree to which emergent perspectives can be pursued is a matter of balance given the practicalities of business, including those imposed by the external environment and the internal source situation. Still, on balance the more open to discovery the greater the

likelihood of platform innovation to drive future business success.
